FAQ

How do I know if my pad is ready to charge and charging?

- The LED indicator of the pad blinks shortly and lights up red when connected to power, charging standby.

- When the phone is connected and charging, the LED indicator blinks blue, and will keep light on blue when fully charged.
- When comes to Foreign Body Detection, the blue light keeps blinking.

What if my wireless pad isn't charging my phone?

- Double check there is nothing obscuring the connection between your phone and pad.
- Ensure the input voltage is within the recommended allowance.
- Make sure your device is compatible with Qi wireless charging.
- Try removing your phones protective case.

How can I double check the voltage information for my wireless pad?

- Refer to the user manual that comes with the product and/or refer to information on the packaging, and product itself.

Where should I use the wireless pad?

- We recommend placing the wireless pad down onto a flat and solid surface. Do NOT cover the device and allow for good circulation to prevent overheating.

FCC Warning

This device complies with part 15 of the FCC Rules . Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
